

Africa Investment Exchange 2021

Power & Renewables • Gas • Grid & Storage • Off-grid

Updated 20-4-2021

The meeting place for investors in Africa's infrastructure

Established at RSA House in 2013, the Africa Investment Exchange (AIX) has become one of the meeting places of choice for Africa's energy sector stakeholders.

In 2021 we are combining a monthly online AIX

series with traditional live AIX: Gas and AIX: Power & Renewables meetings in London. Both the online meetings and live events will continue to be held under the Chatham House Rule and structured round panel led discussions.

AIX 2021 programme

Online and in London

The meeting place for investors in Africa's infrastructure

2021 combines a monthly online AIX series with traditional meetings in London.

The monthly meetings will include panel discussions, roundtables and African Energy (AE) insights.

19 January

Sovereign debt:
Is Africa facing a new debt crisis? What does it mean for power projects?

16 February

South Africa:
Drill into latest gas and electricity supply industry trends
AE RSA power report

16 March

Off-grid:
Expansion and investment in SHS and mini-grids

20 April

West Africa:
Looking at latest developments in francophone countries

18 May

Technology:
How might the grid evolve over the next 25 years?
AE Q4 2020 AELD figures

23 June

Hybrid AIX Gas:
Part one: Held online and at RSA House, London

13 July

Nigeria:
Focusing on policy issues and the energy value chain
AE Nigeria power report

21 September

Grid & Storage:
Key issues facing Africa's power network in an age of transition

19 October

East Africa:
Overview of the region's diverse and dynamic energy sector

16-17 November

Hybrid AIX Power & Renewables:
Held online and at RSA House, London

18 November

Hybrid AIX Gas:
Part two: Held online and at RSA House, London

14 December

North Africa:
Developments in the gas and power market across the region

Register

All AIX online meetings will feature:

INTERACTIVE PANELS – Ask questions and share ideas with the AIX community during interactive panels with live chat and polling.

CHATHAM HOUSE RULE – The meetings will continue to be held under the Chatham House Rule to allow for more open and insightful discussion.

SATELLITE SESSIONS – Take advantage of roundtable discussions, interviews, exhibition and social events.

CHAT & NETWORK – Our digital platform makes it easy for the AIX community to chat to one another, catch up with old friends with 1-to-1 video calls and connect with the contacts you want to meet.

UNIQUE CONTENT – Access material including survey results, event summaries and African Energy Live Data analysis.

LIVE OR ON-DEMAND – Watch everything live or pick the time that suits you. Every panel session is recorded so you can catch up later.

Register to AIX: Online

Join the online AIX Community and attend individual events or register to six monthly meetings.

- 1 month's access: £75 + VAT
- 6 months' access: £360 + VAT

Your ticket includes access to panel discussions, conference website, satellite sessions, attendee list and all networking opportunities on the conference platform. Plus exclusive statistics from [African Energy Live Data](#).

Additional discounts for multiple passes are also available

- 2-3 attendees – 10% discount
- 4-5 attendees – 15% discount
- 6+ attendees – 20% discount

[Book online](#) or contact [Lauren Andrews](#) for further details

20 April 2021

12h00 to 13h30 BST

The many faces of Francophone Africa

Chaired by Cbl's chairman, Jon Marks the panel discussion will examine latest power generation and other energy and policy trends in the West/Central African francophone countries. Key themes:

- key opportunities and constraints in **Senegal**'s power sector, and challenges facing solar developers entering the market;
- the image and reality of investing in **Côte d'Ivoire**'s private power sector;
- overview of **Guinea**'s electricity supply industry;
- gas-fired growth in Côte d'Ivoire, **Cameroon** and Senegal;
- project potential in the 'water towers', from Guinea to **DRC**;
- key policy themes for operators in the two franc zones;
- security and strategic issues;
- new approaches to tackling the lack of access across the region.

Which technologies can drive Africa's energy transition?

The technology options proposed to tackle energy poverty and stimulate sustainable economic growth in Africa offer dazzling possibilities. Some are already being deployed or have a realistic chance of success but others threaten to waste large amounts of planners' and financiers' time without delivering increased access or new export markets.

This virtual meeting will provide snapshots of emerging renewable and storage technologies, as sector stakeholders share their perspectives and the AIX community asks: which innovations are most technically and financially appropriate for the continent's energy requirements?

- **Energy storage:** the game changer? An investors' perspective
- **Green hydrogen:** a huge amount of hype but is it an affordable industry in its green, blue, brown or grey forms?
- Solar power: from **SHS** to grid-scale is the age of accelerated technical innovation over? Has **PV** won over **CSP**?
- **Clean coal, CCS** and other fossil solutions – are they credible?
- Has gas got a long-term role as the **transition fuel**?
- How applicable are renewable energy innovations, including **wave energy, floating wind and pv**?
- M-Pesa and other examples of innovations able to meet uniquely African opportunities. Is **off-grid** the answer?

CHATHAM HOUSE RULE – The meetings will continue to be held under the Chatham House Rule to allow more open and insightful discussion.

23 June

AIX: Gas programme

Add to calendar

23 June

AIX: Gas returns to RSA House – alongside on-screen participants around the world – to discuss whether natural gas really is the 'transition fuel'.

We look forward to welcoming upstream and LNG players together with investors, senior officials, power sector and downstream developers for an afternoon of panel discussions and an evening reception.

Co-produced by CBI's **African Energy**, the meeting is structured around interactive panel-led sessions and held under the Chatham House Rule.

13h30 BST – Registration and coffee

13h45 – Conceptualising the industry's future shape

With fossil fuel markets under ever greater pressure from shifting strategies and projects searching for increasingly elusive funding as stakeholders follow a climate change agenda more rigorously, AIX: Gas will examine the relevance of gas to African economies, their domestic markets and export potential.

15h00 – Networking break

15h30 – Opportunities and challenges investing in south-eastern Africa

A regional focus with lessons for all stakeholders operating in and around the industry.

16h30 – The western margins

A discussion of opportunities along the West coast, from Morocco to Nigeria.

17h45 – Reception at RSA House and virtual meetings

London & online

The hybrid AIX Gas meeting will be held online and at RSA House, London.

The 7th annual AIX Gas will take place over two meetings in 2021.

- Part one on 23 June
- Part two on 18 November
